

Yashaswini MN

+91 9353191699 — yashaswinimn26@gmail.com — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

Profile Summary

Full Stack Software Developer with **1+ year** of experience building scalable web applications and **REST APIs** using **React, Django, and MERN stack**. Proven experience in backend optimization, microservices architecture, and AI-powered solutions. Skilled in deploying production-grade systems using **Docker, CI/CD pipelines, and cloud platforms**.

Technical Skills

Languages: Python, JavaScript (ES6+), TypeScript, SQL, Java

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, Django, Django REST Framework, FastAPI, Flask

AI / Machine Learning: TensorFlow, PyTorch, OpenCV, Scikit-Learn, Pandas, NumPy

Databases: PostgreSQL, MongoDB, SQL Server

DevOps & Tools: Docker, Jenkins, CI/CD, Microsoft Azure, Git

Core Concepts: Data Structures & Algorithms, REST APIs, Microservices, System Design

Work Experience

Thought Process Systems LLP

Apr 2025 – Present

Software Developer

Bengaluru

- Migrated **50+ VB.NET pages** to a scalable **React.js + Django** architecture, improving system performance, maintainability, and code scalability.
- Developed **150+ REST APIs** using **Django REST Framework**, enabling scalable and high-performance backend services across core systems.
- Optimized **SQL Server queries** via **Django ORM** and built **Docker-based CI/CD pipelines** with Jenkins, improving deployment efficiency.
- Developed an **AI-powered Story Analyzer [Live]** using **NLP** for grammar, punctuation, and spelling correction, **AI probability detection**, regional English adaptation and authorship analysis.
- Built and deployed **3 production-grade web apps** using **React.js and Tailwind CSS** [[Swapnodaya](#) | [Exskilence](#) | [ThoughtProcess](#)].
- Worked in an **Agile environment**, contributing to sprint planning, code reviews, and deployments.

Projects

SentinelAPI – API Monitoring & Failure Prediction | [Live](#) | [FE](#) | [BE](#) ReactTS | Flask | Machine Learning

- Built an API monitoring system to detect frameworks and extract endpoints across **Django, Flask, and Express**.
- Developed a **Flask-based proxy backend** with **ML-based API failure prediction** for real-time monitoring and latency tracking.

E-Study – Learning Management System | [Live](#) | [FE](#) | [BE](#) MERN Stack | Socket.IO

- Developed a scalable **MERN-based platform** with real-time chat, analytics, and progress tracking.
- Implemented secure authentication using **JWT, Google OAuth**, and email verification workflows.

FinFlow – Finance Dashboard | [Live](#) | [GitHub](#) React (TypeScript) | Recharts | TailwindCSS

- Built a responsive financial dashboard with analytics, transaction tracking, and role-based UI.
- Implemented interactive visualizations and efficient state management for seamless user experience.

Whisper – Anonymous Social App | [Live](#) | [GitHub](#) React.js | Firebase Auth | Firestore

- Developed a real-time anonymous social platform enabling secure content sharing and user interaction.
- Integrated **Firebase Authentication** and **Firestore** for real-time updates and scalable backend.

Plant Disease Prediction System | [GitHub](#) Python | TensorFlow | CNN

- Built a deep learning model on **17,000+ images**, achieving **97.3% accuracy** for disease classification.
- Deployed a real-time inference pipeline for automated predictions.

Education

Bachelor of Engineering in Computer Science

Aug 2021 – May 2025

Mysuru Royal Institute of Technology, Mysuru, Karnataka

CGPA: 9.2/10
